

WOMEN IN TECHNOLOGY: CORPORATE AND ACADEMIC PERSPECTIVES

Moderator: Yolanda Guran, Ph.D.
Associate Professor
Oregon Institute of Technology

Yolanda Guran is an Associate Professor of Electronics at Oregon Institute of Technology (OIT). Since 1989 she has been in charge of the Electronics Engineering Technology program at the college of metropolitan center in Portland, Oregon. In 1991 she founded the OIT Metro Women's Club and is currently serving as faculty advisor to the club.

Ms. Guran has a MSEE from the Polytechnical Institute of Bucharest, Romania and is a registered professional engineer in Electrical Engineering in the State of Oregon. Professional interests focus on analog integrated circuit design and modeling of electronic devices. She is also interested in the career development of women in engineering.
