

GRANTSMANSHIP: DEVELOPING SUCCESSFUL PROPOSALS

Moderator: Lola E. Rogers
Program Director, Programs for Women and Girls
National Science Foundation

A member of the National Science Foundation professional staff since 1979, Lola Eriksen Rogers is presently Program Director for Programs for Women and Girls. She has served as the program officer for Visiting Professorships for Women, and as coordinator of the NSF Outreach Program, as well as for the Foundation's distributed research programs. In these roles, she worked with all program divisions of the Foundation. Initially, she worked for NSF as an Intergovernmental Specialist.

She originally came to Washington as an Education and Research Program Officer in elementary and secondary science for the U.S. Office (now Department) of Education. Her publications there included two comprehensive national studies, junior high school science, and U.S. museum education programs. The latter resulted from a pioneering effort which she directed, cooperatively sponsored by USOE, the Smithsonian Institution, and the American Association of Museums.

Presenters: William Butcher, Ph.D.
Senior Engineering Advisor, Directorate for Engineering
National Science Foundation

Larry Goldberg, Ph.D.
Acting Director
Division of Electrical and Communications Systems
National Science Foundation

Betty Jones, Ph.D.
