

<b>MAXIMIZING COLLABORATIVE EFFORTS FOR SUCCESS</b>
---

**Moderator**

Jacqueline Smith  
Director, Minority Engineering Programs  
University of Central Florida at Orlando

Jacqueline Smith is the Director of Minority Engineering Programs and the University SECME Director at the University of Central Florida. She plans, seeks funding for and implements pre-college engineering programs, and provides academic mentoring and other support services for engineering students. She is co-advisor for the UCF chapter of the National Society of Black Engineers and the Society for Hispanic Professional Engineers. She is currently chair of Region B (southeast) National Association of Minority Engineering Program Administrators (NAMEPA). In addition to her work with engineering programs, Ms. Smith has taught in the Willingboro Junior High Schools and served on the school board of the American School in Accra, Ghana. She has extensive experience in counseling and training. She serves on many college and community action committees. She is currently a national board member of NAMEPA, and the Vice President of the Central Florida Police Athletic League.
