

GENDER EQUITY AND CLASSROOM CLIMATE

Moderator

Jane Z. Daniels, Ph.D.
Director, Women in Engineering Program
Purdue University

Jane Daniels is director of the Women in Engineering Program at Purdue University--a position she has held for the last 18 years. Purdue was the first institution to develop programs for women in engineering and more women have earned engineering degrees at Purdue than at any other college or university in the United States. Under Dr. Daniels' leadership, the Women in Engineering Program has developed a comprehensive set of activities which inform young women about careers in engineering, encourage them to study engineering at Purdue, and offer a variety of activities and services to women once they are enrolled in engineering. In recent years, the Women in Engineering Program is addressing the more difficult issues of institutional change which will affect the success of women engineering students in a positive way.

Speakers

Karan Watson, Ph.D.
Associate Dean of Engineering
Texas A&M University

Emily Wadsworth, Ph.D.
Assistant Director, Women in Engineering Programs
Purdue University

Allan Fisher, Ph.D.
Associate Dean, School of Computer Science
Carnegie Mellon University

Barbara Bogue
Director, Women in Engineering Program
The Pennsylvania State University
